GPR Remote Sensing in Archaeology | Dean Goodman | Springer

GPR Remote Sensing in Archaeology provides a complete description of the processes needed to take raw GPR data all the way to the construction of subsurface images. The book provides an introduction to the theory of GPR by using a simulator that shows how radar profiles across simple model structures look and provides many examples so that the complexity of radar signatures can be understood. It continues with a review of the necessary radargram signal processes needed along with GPR Remote Sensing in Archaeology: Dean Goodman, Salvatore ...
