Johnson Claudio Alatorre Zayra Romo Feng Liu Low-Carbon Development for Mexico provides a robust and rigorous assessment of the costs of different options for low-carbon development, from energy efficiency to afforestation. It also shows that even when one relies on existing technologies, there are a number of relatively

[Low-Carbon Development for Mexico - World Bank](#) One of the most compelling reasons for pursuing low-carbon development is that the potential impacts of climate change are predicted to be severe, for both industrial and

developing countries, and that reducing greenhouse gas emissions can reduce the risk of the most catastrophic impacts. The

[Low-Carbon Development for Mexico | BiggerBooks](#)

To reduce the risk of climate change impacts it is necessary for the world to lower the carbon intensity of economic development. 'Low-Carbon Development for Mexico' estimates the net costs, greenhouse gas (GHG) emission reductions, and investment that would be needed to achieve a low-carbon scenario in Mexico to the year 2030. Among the key
