Method and Appraisal in the Physical Sciences edited by ...

First published in 1976, this is a volume of studies on the problems of theory-appraisal in the physical sciences - how and why important theories are developed, changed and are replaced, and by what criteria we judge one theory an advance on another. The volume is introduced by a classic paper of Imre Lakatos's, which sets out a theory for tackling these problems - the methodology of scientific research programmes. Five contributors then test this theory against particular and celebrated

Method and appraisal in the physical sciences : the ...

Five contributors then test this theory against particular
and celebrated case-studies in the history of the physical
sciences (particularly in the nineteenth century). The
volume ends with a characteristically forceful and original
critique of the whole enterprise by Paul Feyerabend. the
book is a companion volume to Method and Appraisal in
Economics. Both are natural sequels to Criticism and
